

Due to the start of flu season and the need to protect our patients, visitors and their families, a restriction will be enforced on the age of our family members who visit. NO one age 18 or younger will be permitted to visit an in-patient under any circumstance.

Anyone who does come to visit will be sent home immediately with their respective family **if displaying any flu like symptoms**. This will be in effect until flu season is over as defined by the CDC.

TWO VISITORS PER PATIENT AT ONE TIME.

THIS WILL GO INTO EFFECT AS OF OCTOBER 26,2009.
